

# CUSTOMISED ACCESSORIES FOR MTI HORIZONTAL MIXERS

## Perfect ventilation

Jetfilter

## Be cool

Insulation of all cooled vessel plates

## Rust-proof

Double jacket made from stainless steel – also available with inspection port

## Great variety

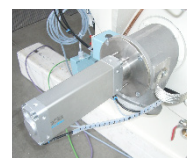

Alternative discharge design – for any situation

## Another exit

Mixer equipped with additional discharges

## Quick check

Discharge for taking samples – easily accessible – without interruption of the production process

## Get it in

Additional inlet sockets, variable in size and position

## Dispersing aid

Chopper to optimise the process

## Weight watching

Mixer on load cells, e.g. for control of the discharge rate

# CUSTOMISED ACCESSORIES

## Is there a space requirement?

Alternative drive configurations

## Climatic cool

Air conditioning for control cabinet

## The right interface to your overhead plant

Connection to external controls: PN/PN-coupler, DP/DP-coupler, potential-free contacts, etc.

## Suitable input modules

Various panel sizes available – from functional to big size touch screen – also in a separate housing

## Control it yourself

Mixer without controls – wiring to terminal boxes only

## Bridge support

UPS  
**U**ninterrupted  
**P**ower **S**upply  
against power drop or failure

## Explosive mixtures

Mixer design according to ATEX

## Good atmosphere

Nitrogen inerting & O<sub>2</sub>-measuring

## Ready to cope with any pressure

Heat exchanger for indirect cooling water supply
